

# Technical Brief: North Dakota Student Engagement Survey, 2022-23

V1.0., June 30th, 2023

---

## 1. Introduction

This report provides a technical overview of North Dakota's 2022-23 statewide administration of the Cognia™ Student Engagement Survey (SES) to elementary, middle, and high school students, which was conducted from January 16 through February 24, 2023.

The SES collects feedback directly from students about their learning experiences. Survey results provide a useful summary of the insights learned from student responses and provide schools and districts with the opportunity to understand student engagement in greater detail. These insights enable schools, districts, and states to engage in more collaborative conversations with institution stakeholders to better respond to the needs of their students.

Data from completed surveys are reported at the school, district, and state level and results are categorized by type and level of engagement. The school receives data on the percentages of Committed, Compliant, and Disengaged students for each of the three engagement domains (Behavioral, Cognitive, and Emotional) based on completed responses.

At the state level, data is reported annually as an indicator of school quality as part of the state's accountability system under the Every Student Succeeds Act (ESSA). This "Student Engagement" indicator accounts for 30% of elementary or middle schools' overall rating and 20% of high schools' overall rating for the school year.

This report focuses on the three types of engagement, which correspond to reporting and intended interpretations.

## 2. Instrument Overview

There are generally four ways to measure student engagement: self-report surveys, teacher reporting, interviews, and observations. Of these four, surveys and observations are the most widely used and reliable. The SES is based on extensive research and collects direct feedback from students regarding their level and type of engagement in the learning process while assessing how much they enjoy school on a variety of practical and actionable levels.

Each of the SES items are designed specifically to measure student engagement in the following three domains of engagement: Behavioral, Cognitive and Emotional. Behavioral engagement refers to a student's efforts in the classroom (e.g., attendance, participation); Cognitive engagement examines a student's investment in learning; and Emotional engagement measures a student's emotions or feelings about the classroom and school, in general (e.g., connectedness with school).

Response options for all items across the three domains are first categorized according to three engagement types: Committed, Compliant, and Disengaged. Additionally, each engagement type consists of two distinct levels: Levels in the Committed type are Invested and Immersed; the Compliant types are Strategic and Ritual; and the Disengaged type levels are Retreatism and Rebellion. Individual student engagement is categorized within each domain based on the most frequent engagement type. For example, a student who answers three or more questions with Committed values within the Behavioral domain would be categorized as Committed for that domain. The relationship between engagement type and engagement level is presented in Table 1.

The SES measures student engagement in elementary (grades 3-5), middle (grades 6-8), and high school (grades 9-12) through students’ responses to 21 items about their learning experiences described above. A version of the survey was created for each of the three grade spans with age-appropriate item text.

**TABLE 1. Student Engagement Domain Type and Level Descriptions**

Engagement Types		Engagement Levels	
<b>Committed</b>	Student finds personal meaning and value in tasks	Invested	<i>Student leader, exceeds expectations, and invests time in improvement</i>
		Immersed	<i>Performs constantly at high level, and possesses deep conceptual understanding</i>
<b>Compliant</b>	Meets expectations, follows rules, actively avoids consequences	Strategic	<i>Allocates necessary energy and resources and is reward driven</i>
		Ritual	<i>Minimal attention, easily distracted</i>
<b>Disengaged</b>	Unmotivated, low participation, actively avoids completing tasks	Retreatism	<i>Not attentive to work, distracts others, conceals lack of involvement</i>
		Rebellion	<i>Refusal to comply with requirements, actively rejects tasks</i>

### 3. Participation

Results described in this report are based on responses from 78,440 students in grades 3–12 from 481 schools in 167 public school districts. The number of responses reflects completed SES responses and not necessarily the population of students, schools, or districts in the state. Participating districts and schools are listed in Appendix C including information about number of student responses and percent committed by each domain.

Responses were approximately evenly distributed across each grade within grade spans. Table 2 displays the number of students, by grade, who submitted complete responses.

**TABLE 2. Number of Completed Surveys by version and Grade**

SES Survey Version	Number	Percentage
<b>Elementary School</b> <b>(Grades 3-5)</b>	25,534	33%
<b>Middle School</b> <b>(Grades 6-8)</b>	23,919	30%
<b>High School</b> <b>(Grades 9-12)</b>	28,999	37%

## 4. Item Analysis

Across all three versions of the SES—elementary, middle, and high school—the survey consists of items categorized and organized into the three domains of engagement: Behavioral (questions 1-7), Cognitive (questions 8-14), and Emotional (questions 15-21). Each item response is scored on a six-point scale (0–5). Point values correspond to the six engagement levels described previously.

Tables A1 to A3 in Appendix A provide item statistics according to grade-span including means (average response to an item), standard deviations (dispersion of scores; how “spread out” are scores for that item), and item correlations (relationship between item score and total domain scores). Item text for each version of the survey can be found in Appendix B. Note that “Q” followed by a number indicates question number.

### Notable Findings

Elementary school version:

- Item averages were the highest for Q6 (3.66) and Q12 (3.62) while Q21 (2.31) and Q16 (2.39) had the lowest means, indicating the lower-scoring options were more frequently selected.
- The average of item averages was 3.13.
- The majority of survey items (19 out of 21) were moderately to strongly correlated ( $r > 0.4$ ) with the domain total score (e.g., the Behavioral domain total score is the sum of Q1 through Q7).

Middle school version:

- Item averages were highest for items Q5 (3.66) and Q12 (3.55); the lowest averages were observed for items Q16 (1.70) and Q18 (2.01).
- The average of item averages was 2.68.
- All survey items (21 out of 21) were moderately to strongly correlated to the total domain score.

High school version:

- Students generally rated Q5 (3.58) and Q12 (3.28) the highest and Q16 (1.63) and Q15(2.04) the lowest.

- The average of item averages was 2.60.
- All 21 items were moderately or strongly correlated to the total domain score.

Across grade-span versions of the SES:

- The average for Q16 was the lowest for middle and high school students (“Which response best describes how you feel at the end of the day?”).
- The item averages decline as grade span increases (elementary = 3.13; middle = 2.68, high = 2.60).
- The Emotional domain had the lowest overall item averages across all three grade spans. The Cognitive domain demonstrated the highest item averages in elementary school while the Behavioral domain item averages were the highest rated in middle and high school.
- The Cognitive domain and the Behavioral domain had similar item averages with the Cognitive domain slightly higher than the Behavioral domain (3.21 and 3.20 respectively) in elementary school.
- The Behavioral domain demonstrated the highest item averages in middle and high school.

## 5. Item Response Distribution

This section describes the distribution of SES item response scores across the three grade span versions, elementary, middle, and high school.

Elementary school version:

- The largest proportion of Committed responses were observed for Q6 (76.91%) and Q20 (73.91%).
- The two items with the largest proportion of Disengaged were Q16 (42.04%) and Q08 (23.60%).

Middle school version:

- The largest proportion of Committed responses were observed for Q12 (67.71%) and Q5 (56.04%).
- The largest proportion of Disengaged responses were Q16 (44.81%) and Q18 (41.24%).

High school version:

- The top two Committed items were Q5 (54.92%) and Q17 (49.35%).
- Similar to the other two versions, Q18 (41.28%) and Q15 (40.18%) received the largest proportion of Disengaged responses.

Overall:

- Students selected the full range of available responses across the versions, with respondents selecting the option associated with the middle engagement type (Compliant) or above for most items.
- The highest-scoring item was different in different versions of survey. No item was common among the top five highest-scoring items (scored as Committed) for all grade spans.

Figures 1–3 display the number of student responses within each engagement type (Committed, Compliant, Disengaged). For more information on item response percentages by engagement type, see Tables A4 to A6 in Appendix A.

**FIGURE 1: Elementary School Response Frequencies, by Engagement Type**

Note: Full item text available in Appendix

**FIGURE 2: Middle School Response Frequencies, by Engagement Type**

**FIGURE 3: High School Response Frequencies, by Engagement Type**

## 6. Domain Classification

Individual students' engagement is classified according to the modal item response within each domain. Specifically, the most frequently occurring engagement type (Disengaged, Compliant, or Committed) within each of the Behavioral, Cognitive, and Emotional domains is used to assign a domain engagement type for each student.

Data from students' completed surveys are reported by grade spans and domain as percentages by engagement type: Committed, Compliant, and Disengaged. The reported percentages are calculated as the number of respondents in each domain's type of engagement divided by the total number of respondents who completed the survey. Figures 4 - 6 depict student engagement responses broken out by grade-span, domains, school years, and compare results from the 2022-23 SES administration against the 2021-22 SES administration.

- Elementary school students in 2022-23 demonstrated high percentages of Committed responses in the Behavioral (66.17%), Emotional (63.14%), and Cognitive (60.02%) domains, while less than 10% of students reported Disengaged responses for Behavioral (6.11%) and Cognitive (5.58%) domains. This pattern also held true for the 2021-22 results.
- Middle school students in 2022-23 yielded 45.74% Committed responses in the Behavioral domain, 33.65% in Cognitive, and 29.97% in Emotional. These percentages are very close to 2021-22 results.
- High school students in 2022-23 yielded Committed response percentages of 37.76% in the Behavioral domain, 28.75% in Emotional, and 21.77% in Cognitive. These percentages are similar to 2021-22 results.
- Overall, the results between 2022-23 and 2021-22 SES administrations are very similar with small fluctuations in percentages.

## 7. Reliability and Validity Evidence

### Internal Consistency Reliability

Survey responses were used to investigate evidence for the internal consistency reliability across the three grade-span versions of the survey. Reliability was calculated according to Cronbach’s Alpha ( $\alpha$ ) and McDonald’s omega ( $\omega$ )<sup>1</sup>. All three versions demonstrate Alpha values of 0.81 and higher, and omega values of 0.82 and higher (see Table 4). These values provide evidence that the SES demonstrates sufficient reliability to make decisions about groups of students<sup>2</sup>.

### Validity Evidence

Validity evidence for the measurement of Behavioral, Cognitive, and Emotional domains of engagement on the SES is also presented in Table 4, as correlations between domains, within each of the grade-span versions. Specifically, correlations of responses across domains are presented in the off-diagonal cells and represent discriminant validity evidence (indicating the degree to which domains are separate and

<sup>1</sup> Though Cronbach’s Alpha is widely used and understood as a measure of reliability, McDonald’s omega is a distinct reliability coefficient with the advantage of considering the strength of association between items, leading to a stronger measurement of the scale’s internal consistency.

<sup>2</sup> Salvia, J., & Ysseldyke, J. E. (2004). *Assessment in special and inclusive education (9th ed.)*. Boston: Houghton Mifflin.

distinct from one another) while convergent validity evidence is presented in the cells along the diagonal as reliability (i.e., omega; indicating the consistency of measurement within the domain).

Within-domain reliabilities range from 0.63 to 0.81 demonstrating sufficient and strong convergent validity evidence. Across-domain correlations are moderate to strong and range from 0.47 to 0.65; however, the across-domain reliabilities (i.e., discriminant validity evidence) are consistently lower than the associated within-domain reliabilities. These results indicate that the SES consistently measures student engagement within each of the three domains, which are related to each other, but demonstrates sufficient independence as to be considered separate traits or constructs.

**TABLE 4. Convergent and Discriminant Validity of Domains, by Grade Span**

Grade Span	Domain	Behavioral	Cognitive	Emotional
Elementary School ( $\omega = 0.82, \alpha = 0.81$ )	Behavioral	<b>0.636</b>		
	Cognitive	0.483	<b>0.658</b>	
	Emotional	0.469	0.561	<b>0.796</b>
Middle School ( $\omega = 0.87, \alpha = 0.84$ )	Behavioral	<b>0.647</b>		
	Cognitive	0.573	<b>0.703</b>	
	Emotional	0.543	0.631	<b>0.764</b>
High School ( $\omega = 0.87, \alpha = 0.85$ )	Behavioral	<b>0.691</b>		
	Cognitive	0.579	<b>0.806</b>	
	Emotional	0.539	0.645	<b>0.803</b>

## Confirmatory Factor Analysis

Additional validity evidence for Cognia’s SES is demonstrated using statistical techniques to evaluate the underlying theoretical structure, or latent factor model. The relationship among items, domains (Behavioral, Cognitive, and Emotional), and overall engagement for each grade-span version can be represented according to two latent factor models. The Unidimensional Model conceives student performance on items as simply correlated to general engagement; the First-Order Model suggests that student performance on each item is correlated with a specific domain and those domains are correlated with each other.

Confirmatory Factor Analysis (CFA) is the statistical technique used to evaluate which of the unidimensional or first-order models fits the data best and to confirm that the target model fits the data well. Model comparison is conducted according to a Likelihood-Ratio Test, with significant differences indicating that the more complex (i.e., first-order) model fits best; model evaluation is conducted by comparing standard model fit statistics (*RMSEA* and  $\chi^2/df$ ) against critical values in an empirical sampling distribution that was generated according to a bootstrap resampling procedure (replications = 100;  $\alpha = 0.05$ ).

Model evaluation found that RMSEA and  $\chi^2/df$  values did not exceed the empirically determined significance values; therefore, the models all fit the data sufficiently well to enable further comparison and interpretation<sup>3</sup>. Model comparison according to the results of Likelihood-Ratio Tests between the unidimensional models and first-order models found in all instances that first-order models fit significantly better than the unidimensional models. Together, these results provide evidence supporting measurement and reporting of Cognia’s Student Engagement Survey results according to the Behavioral, Cognitive, and Emotional domains.

Model evaluation and comparison results are summarized by version in Table 5.

**TABLE 5. Confirmatory Factor Analysis Model Summary, by Grade Span**

Grade-Span	Model	N	df	RMSEA	$\chi^2/df$	Notes
Elementary School	Uni	25,534	189	0.033	29.10

## Appendix B: SES Questions

TABLE B1. Cognia’s Elementary School Student Engagement Survey Item Text

Domain	Position	Elementary School Item Text
<b>Behavioral</b>	01	During class, I...
	02	If a student is upset, I...
	03	If the classwork is hard to do, I...
	04	Following class rules...
	05	When I work in a group, I...
	06	When I am given a task, I...
	07	School rules...
<b>Cognitive</b>	08	Which one is most like you?
	09	In class, I...
	10	Learning goals...
	11	When I have a test, I...
	12	When my teacher asks me a question, I...
	13	The skills I learn in class...
	14	Class activities...
<b>Emotional</b>	15	How do you feel when you say something in class?
	16	At the end of the school day, I feel...
	17	When I need help, I...
	18	How do you feel about your school?
	19	I feel my schoolwork is...
	20	When there is a school activity, I...
	21	What makes you feel good as a student?

**TABLE B2. Cognia’s Middle School Student Engagement Survey Item Text**

<b>Domain</b>	<b>Position</b>	<b>Middle School Item Text</b>
<b>Behavioral</b>	01	During class...
	02	If I see or hear about another student being picked on, I...
	03	If the classwork is hard to do, I...
	04	Following class rules...
	05	When I work in a group, I...
	06	When given a task, I...
	07	School rules...
<b>Cognitive</b>	08	Which response describes how you best learn?
	09	In class, I...
	10	Having learning goals...
	11	To prepare for a test, I...
	12	When my teacher asks me a question, I...
	13	The skills I am being taught...
	14	The class activities...
<b>Emotional</b>	15	How do you feel when you say something in front of the class?
	16	What response best describes how you feel at the end of the day?
	17	Which statement best describes your relationship with your teachers?
	18	How do you feel about your school?
	19	When I think about my schoolwork, I...
	20	When there is a school activity, I...
	21	What makes you feel successful as a student?

**TABLE B3. Cognia’s High School Student Engagement Survey Item Text**

Domain	Position	High School Item Text
<b>Behavioral</b>	01	During class...
	02	If a student is being picked on, I...
	03	If the classwork is hard to do, I...
	04	Following class routines...
	05	When I work in a group, I...
	06	When an assignment is given, I...
	07	School rules...
<b>Cognitive</b>	08	Which response best describes how you see yourself as a student?
	09	When I am in class, I...
	10	Having personal learning goals...
	11	To prepare for a test, I...
	12	When I don’t understand something, I...
	13	The skills I am being taught...
	14	The class activities...
<b>Emotional</b>	15	How do you feel when you say something in front of the class?
	16	Which response best describes how you feel at the end of the day?
	17	Which statement best describes your relationship with your teachers?
	18	What do you like most about your school?
	19	When I think about my schoolwork, I...
	20	When there is a school activity, I...
	21	What makes you feel successful as a student?
